Profile

Computer Engineering undergraduate at USP's Polytechnic School with experience in data analytics, energy markets and foreign exchange. Combines dashboard development and process automation with artificial intelligence research and team leadership. Currently supports commercial operations at TRIA Trading.

Education

University of São Paulo (USP)
Computer Engineering | Polytechnic School
Jan 2022 - expected graduation: 2027

Professional experience

TRIA Trading | Commercial Intern
Sep 2026 - Present

- Support commercial activities related to buying and selling electricity in Brazil's deregulated power market, working alongside the sales team.
- Develop a prospecting and lead-management platform prototype to cross-reference CCEE and HubSpot datasets, with deduplication, filtering and AI-assisted organization of commercial information.

Núclea | HR Technology Intern
Jun 2025 - Aug 2025

- Built Power BI dashboards and analyzed compensation and benefits data using Excel and MySQL, covering headcount, hiring, separations, turnover, career progression and performance.
- Automated spreadsheet consolidation and structured data models; added departmental change histories to dashboards and used Git for version control.
- Investigated relationships between commuting distance, employee separations and return-to-office patterns, presenting findings to the team.

BTG Pactual | Summer Analyst, Foreign Exchange
Jan 2024 - Feb 2024

- Supported market analysis and quantitative model development for the Foreign Exchange (FX) team.
- Developed front-end interfaces for the international FX team's needs.

Skills

Data: Advanced Excel, Power BI and SQL (MySQL).

Programming: Python; Java and C (academic experience); Git.

AI: NLP, OCR, generative AI and large language models (LLMs).

Commercial: HubSpot CRM, prospecting and lead qualification.

Management: Projects, people and teams; budgets, events and communication.

Luigi Scofano de Araujo

Academic research

LASSu-USP | Undergraduate Researcher, Virtual Reality
Sep 2026 - Present

- Contribute to the development of an interactive virtual museum on the history of computing, with a browser-based 3D environment.
- The project uses Three.js, TypeScript and Vite for navigation, interaction with 3D models and the display of information panels.

IME-USP | Undergraduate Researcher, NLP
Sep 2024 - Sep 2026

- Contributed to a working version of an Old Tupi translator and the structure of an electronic dictionary, applying natural language processing (NLP) to linguistic data.
- Investigated limitations of OCR and language models in reading historical sources, supporting language preservation and digital accessibility.

Leadership and activities

Poli-USP Athletic Association | Jiu-Jitsu Director
Jul 2023 - Dec 2025

- Managed budgets and staff recruitment, coordinated the team, training and facilities, and supported events, seminars, competitions and student relations.

Brazilian Jiu-Jitsu Instructor
Jan 2023 - Present

- Teach jiu-jitsu and self-defense across age groups using Gracie University methodology (Gracie Combatives and Bullyproof); teach sport jiu-jitsu at USP, prioritizing safety and inclusion.

Class Representative | University of São Paulo

- Served as a liaison between students and faculty, communicating requests and supporting the resolution of academic issues.

Languages

Portuguese: native
English: advanced, Cambridge C1 Advanced (2021)
Spanish and French: intermediate

Selected courses

CS50 | Harvard / edX | 2026

Excel | University of British Columbia / edX

Introduction to Engineering (PIUES) | PUC-Rio | 2020

Unity, Blender and artificial intelligence in Unity | Happy Code | 2016-2018

IED Design Experience | Istituto Europeo di Design | 2019

International Relations | IBMEC | 2020

English, beginner to advanced | Red Balloon | 2017-2021

Honors
